## EDUCATION

### Carleton University

Bachelor of Computer Science: (10.19/12 CGPA)

Ottawa, ON

Sep 2021 – Dec 2026

## TECHNICAL SKILLS

**AI/ML & Data Science** | Generative AI, Multimodal AI, Computer Vision, LLMs, RAG, Prompt Engineering, Vector Databases (ChromaDB), LangChain, Ollama, Python, Pandas, NumPy

**Languages** | Python, TypeScript, Java, SQL (Postgres), JavaScript, C/C++, HTML/CSS

**Web Frameworks** | Next.js, React, FastAPI, Spring Boot, Node.js, Express.js, Django, Flask, Streamlit

**Cloud & DevOps** | AWS (ECS Fargate, SQS, DynamoDB, CloudFront), Terraform, Azure, Git, Docker, Kubernetes, Linux, Bash, SQL (Postgres), NoSQL (MongoDB)

## EXPERIENCE

### Software Engineer (Part-Time, previously Full-Time Co-op)

Jan 2025 – Present

CGI Ottawa, ON

- Led full-stack development and production deployment of a mission-critical payment processing app (Java Spring Boot, AWS), ensuring seamless transition for Government of Canada stakeholders.
- Revamped member registration workflows by implementing secure file handling and ServiceNow integration, eliminating manual email exchanges and reducing ticket resolution time.
- Architected a centralized internal dashboard using **Django** and **Python** to consolidate operational tools, replacing ad-hoc scripts with a unified UI for the operations team.
- Developed complex SQL reporting tools against production PostgreSQL databases, enabling the operations team to generate real-time member status reports.

### Business Intelligence & Operations Co-op

Sep 2023 – Dec 2023

Royal Canadian Mint

Ottawa, ON

- Developed Python automation scripts to ingest and process over **62,000+ data points**, significantly reducing manual data entry errors and processing time.
- Conducted technical research on blockchain applicability for distribution systems, presenting data-driven optimization strategies to senior management.

### Founder & Full Stack Developer

June 2020 – July 2022

LeagueKingdom

Toronto, ON

- Built and launched a profitable niche e-commerce marketplace using **React**, **Express.js**, and **MongoDB**.
- Managed backend infrastructure on Linux VMs, writing Bash automation scripts to streamline inventory management and order fulfillment.
- Executed digital marketing campaigns that increased site traffic and user retention by 25%.

## PROJECTS

### PhotogenAI | Next.js, TypeScript, FastAPI, Python, AWS (Terraform)

Nov 2025

- Built a production multimodal AI SaaS turning casual product photos into studio-quality creatives in under 60 seconds using **Google Gemini 2.5 Flash**.
- Architected an event-driven microservices system on AWS (ECS Fargate, SQS, DynamoDB) with full **Terraform IaC**, achieving zero-downtime horizontal scaling.
- Designed advanced vision + text-to-image pipeline with proprietary in-painting techniques guaranteeing perfect subject preservation across angles and lighting.
- Implemented enterprise safeguards: per-second billing, rate limiting, and 24-hour data ephemerality.

### Auto Assistant 360 | Python, OpenAI Agent SDK, PostgreSQL

Apr 2025 – May 2025

- Developed an autonomous AI support agent using Python and OpenAI's Agent SDK during an internal hackathon at CGI, automating email support ticket resolution.
- Engineered a **GPT-4o powered agent** capable of intent classification, tool selection, and autonomous task execution to resolve queries without human intervention.
- Designed an email parsing pipeline triggering conditional logic workflows, reducing manual triage time.

### GenAI Document Q&A | Python, LangChain, Ollama, RAG

Feb 2025

- Developed a local RAG system utilizing LangChain and Ollama to enable natural language querying of PDF documents.
- Implemented a vector search pipeline using **ChromaDB** and **SentenceTransformers** for high-accuracy semantic retrieval.
- Engineered prompt templates to strictly bound the LLM's responses to retrieved context, mitigating hallucinations.

## CERTIFICATIONS

### CompTIA Security+ (SY0-701)

July 2024

### Google Cybersecurity Professional Certificate

May 2024

### ISC2 Certified in Cybersecurity (CC)

May 2024
