EDUCATION

Carleton University

Bachelor of Computer Science (3.7/4.0 GPA)

Ottawa, ON

Sep 2021 – May 2026

CERTIFICATIONS

AWS Certified Solutions Architect – Associate

Nov 2025

CompTIA Security+ (SY0-701)

Jul 2024

EXPERIENCE

Software Engineer

Jan 2025 – Present

CGI

Ottawa, ON

- Led a cross-functional team adopting **AI-native, spec-driven development** (BMad, Claude Code), building an internal operations platform on **Azure** with **Next.js**, **Prisma**, and **PostgreSQL**.
- Centralized manual workflows for KPI tracking, accounts receivable outreach, member suspensions, and write-off identification and file preparation, **saving 12+ hours of weekly labor**.
- Delivered a critical payment processing application to ISED Canada adhering to **PCI DSS** compliance standards by developing the full-stack **Java Spring Boot** solution and collaborating with the cloud team on the **AWS** deployment.
- Shortened member registration approval time by several days by implementing secure file handling and **ServiceNow** integrations.
- Cut client report generation from hours to minutes and eliminated manual errors with **Python (Pandas)** and **SQL** pipelines.

Software Engineer Co-op

Sep 2023 – Dec 2023

Royal Canadian Mint

Ottawa, ON

- Automated weekly Excel reporting with **Python** web scraping, **saving several hours** of manual work and improving accuracy.
- Collected **62,000+ ATM addresses** nationwide with a **BeautifulSoup** scraper that iterated through postal-code searches.

Founder & Full Stack Developer

Jun 2020 – Jul 2022

LeagueKingdom

Toronto, ON

- Built a **MERN** e-commerce marketplace from scratch and scaled it to **hundreds of active users** and **\$10,000+ in revenue**.
- Sped up digital fulfillment by **over 1000%** with **Bash** automation for concurrent product provisioning on **Linux VMs**.

PROJECTS

Ledger Platform | Python, FastAPI, AWS EKS, Kubernetes, Terraform, Jenkins, Datadog

Jul 2026

- Deployed a payments ledger API on **AWS EKS** behind an ALB and **CloudFront**, backed by Multi-AZ **RDS PostgreSQL** in private subnets, with all infrastructure provisioned through **Terraform** (7 stacks, 70+ resources).
- Implemented atomic transfers with deadlock-safe row locking and an async audit pipeline (**SQS** → **Lambda** → **DynamoDB** and **S3 Object Lock** WORM storage) with idempotent writes, a DLQ, and CloudWatch alarms.
- Built a **Jenkins** CI/CD pipeline (lint, test, Trivy scan, ECR push, rolling EKS deploy), added **Datadog** APM, logs, and metrics, and used **IRSA** for least-privilege pod IAM with HPA autoscaling across 2 AZs.

Price Hunter | Go, AWS Lambda, DynamoDB, SQS, React, TypeScript, Terraform

Oct 2026

- Built and deployed a serverless price-tracking service in **Go** on **AWS** (Lambda, API Gateway, DynamoDB, SQS, EventBridge, SES, Cognito) that monitors product pages and emails users when prices hit their target.
- Designed a fault-tolerant pipeline with **SQS** workers, DLQs, a **DynamoDB Streams** transactional outbox, and per-domain circuit breakers, pricing **2,000 products in 41s** in load tests with **306 tests** (82% coverage).

SecureDrop | Rust, Axum, Tokio, PostgreSQL, Redis, AWS ECS, S3, Terraform

Oct 2026

- Built and deployed a secure file-transfer service in **Rust** on **AWS ECS Fargate** where clients upload directly to **S3** via presigned URLs with signed SHA-256 checksums, supporting resumable uploads up to 5 GB.
- Implemented **Argon2id** auth with refresh-token theft detection, **IDOR-safe** authorization, and **Redis** rate limiting, provisioned KMS, WAF, and GuardDuty with **Terraform**, and wrote **81 integration tests**.

CAGE - Combat Analytics & Grading Engine | Python, scikit-learn, LightGBM, MLflow, FastAPI, React

Jun 2026

- Built an end-to-end **MLOps system** predicting UFC fight winners, training a **LightGBM** model on ~8,500 historical fights with a leakage-safe chronological split to reach **59.6% balanced accuracy**, within ~1 point of the betting market.
- Served it via a **FastAPI** API with **TreeSHAP** explanations to a **React + TypeScript** app, covered by 212 tests.

TECHNICAL SKILLS

Languages | Java, Python, Go, Rust, TypeScript, JavaScript, C/C++, C#, SQL, Bash, HTML/CSS

AWS | EKS, ECS Fargate, Lambda, API Gateway, S3, DynamoDB, RDS, SQS, EventBridge, CloudFront, Cognito, KMS, IAM

Cloud & DevOps | Kubernetes, Terraform, Docker, Jenkins, GitHub Actions, Datadog, Azure, Linux, Git

Frameworks & Data | Spring Boot, FastAPI, React, Next.js, Node.js, Express.js, PostgreSQL, Redis, MongoDB

Security | PCI DSS, OAuth 2.0/OIDC, JWT, Encryption (KMS, TLS), IAM Least Privilege, OWASP Top 10, Threat Modeling

AI/ML | LLMs, RAG, LangChain, scikit-learn, LightGBM, MLflow, Pandas, NumPy
