EDUCATION

Carleton University

Bachelor of Computer Science (3.7/4.0 GPA)

Ottawa, ON

Sep 2021 – May 2026

CERTIFICATIONS

AWS Certified Solutions Architect – Associate

Nov 2025

CompTIA Security+ (SY0-701)

Jul 2024

EXPERIENCE

Software Engineer

Jan 2025 – Present

CGI

Ottawa, ON

- Delivered a critical payment processing application to ISED Canada adhering to **PCI DSS** compliance standards by developing the full-stack **Java Spring Boot** solution and collaborating with the cloud team on the **AWS** deployment.
- Reduced member registration approval time by several days by implementing secure file handling and **ServiceNow** integrations to eliminate manual email loops.
- Resolved immediate team bottlenecks to **save 5+ hours of weekly labor** by developing ad-hoc **Python** automation scripts for repetitive tasks.
- Reduced client report generation time from hours to minutes and eliminated human error by engineering an automated pipeline using **Python (Pandas)** and **SQL**.

Software Engineer

Sep 2023 – Dec 2023

Royal Canadian Mint

Ottawa, ON

- Increased weekly reporting accuracy and **saved several hours** of manual data transfer by developing **Python** scripts to automate web scraping of table data and direct population of Excel reports.
- Delivered **over 62,000 ATM addresses** by executing a large-scale national data collection project and developing a scraping script utilizing **BeautifulSoup** to iteratively simulate postal code entry.

Founder & Full Stack Developer

Jun 2020 – Jul 2022

LeagueKingdom

Toronto, ON

- Scaled a full-stack e-commerce marketplace to support **hundreds of active users** and generate **over \$10,000 in revenue** by building the platform from scratch using the **MERN stack**.
- Streamlined digital fulfillment, **increasing speed by over 1000%**, by implementing **Bash** automation scripts to manage concurrent product provisioning on **Linux VM** infrastructure.
- Maintained a **99% positive review rate** by managing end-to-end technical support and resolving customer inquiries directly.

PROJECTS

CAGE - Combat Analytics & Grading Engine | Python, scikit-learn, LightGBM, MLflow, FastAPI, React

Jun 2026

- Built an end-to-end **MLOps system** predicting UFC fight winners, training and selecting my own model (**LightGBM**) on ~8,500 historical fights to reach **59.6% balanced accuracy** on unseen fights, within ~1 point of the professional betting market.
- Engineered a leakage-safe **ML pipeline** with a chronological train/validation/test split and preprocessing fit on the training fold only, tracked in **MLflow** with versioned, reproducible model artifacts.
- Served the model through a **FastAPI REST API** with corner-bias symmetrization and per-prediction **TreeSHAP** explanations, consumed by a **React + TypeScript** web app, and enforced quality with 212 tests across unit, contract, and integration tiers.

ProductShotAI | Next.js, TypeScript, FastAPI, Python, AWS, Terraform

Nov 2025

- Built a production multimodal AI SaaS turning casual product photos into studio-quality creatives in under 60 seconds using **Google Gemini 2.5 Flash**.
- Designed an initial microservices architecture on **AWS** with full **Terraform IaC**, then re-architected the backend to a serverless **Next.js** solution to achieve **100% cost reduction**.
- Implemented enterprise safeguards: per-second billing, rate limiting, and 24-hour data ephemerality.

Auto Assistant 360 | Python, OpenAI Agent SDK, PostgreSQL

Apr 2025 – May 2025

- Developed an autonomous AI support agent using **Python** and **OpenAI's Agent SDK** during an internal hackathon at CGI, automating email support ticket resolution.
- Engineered a **GPT-4o** powered agent capable of intent classification, tool selection, and autonomous task execution to resolve queries without human intervention.
- Designed an email parsing pipeline triggering conditional logic workflows, reducing manual triage time.

TECHNICAL SKILLS

AI/ML & Data Science | Generative AI, Multimodal AI, Computer Vision, LLMs, RAG, Prompt Engineering, Vector Databases (ChromaDB), LangChain, Ollama, Python, Pandas, NumPy

Languages | Python, TypeScript, Java, SQL (Postgres), NoSQL (MongoDB), JavaScript, C/C#/C++, HTML/CSS

Web Frameworks | Next.js, React, FastAPI, Spring Boot, Node.js, Express.js, Django, Flask, Streamlit

Cloud & DevOps | AWS (ECS Fargate, SQS, DynamoDB, CloudFront), Terraform, Azure, Git, Docker, Kubernetes, Linux, Bash
